## Job Posting Request Form

### Company Name

Training & Treatment Innovations, Inc.

### Position Title

BCBA

### Job Description

Working with children, adolescents and young adults with an Autism Spectrum Disorder (ASD) implementing Applied Behavior Analysis (ABA) within the clinic/home settings. Will conduct extensive behavior observations and assessments utilizing standard measures such as VB-MAPP, ABLLS-R and AFLS. Will develop behavior treatment interventions and revise plans in response to progress. Will train, instruct and supervise behavior technicians in implementation of ABA plans of service and data collection. Will provide family training and support to caregivers. Must be comfortable working in clinic and home settings. BCBA preferred; QBHP considered. Master's degree in mental health-related field from an accredited institution with specialized training and one year experience with ASD. Must be working toward full BCBA certification by September 30, 2020.
